

# FEATURES

Protection PLUS™

PAGE 1 OF 2

**Need to protect and sell one application? Or many?  
Want the ease of a wizard? Or extensive customization ability?**

## A Powerful, Flexible Software Licensing Toolkit

**There is a Protection PLUS edition just for you with the features you need and flexibility you'll love.**

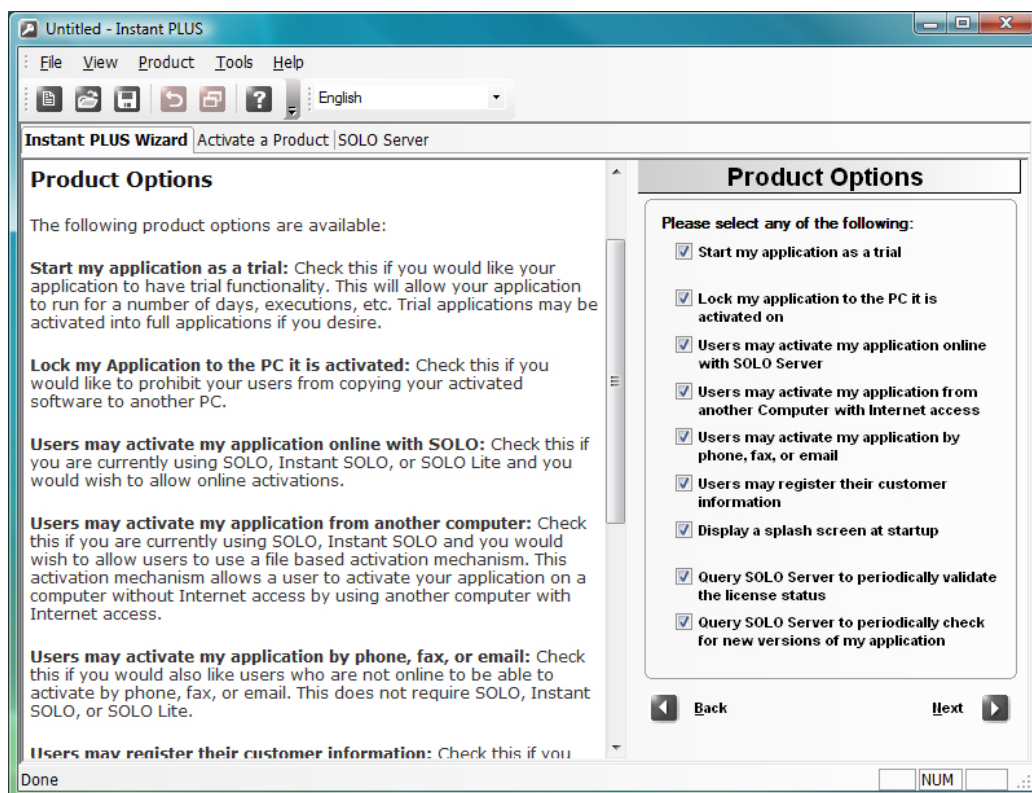

The **Instant PLUS** component is a GUI combining context-sensitive help, an integrated browser connected to SOLO Server, and a step-by-step wizard interface.

You can easily accomplish your licensing needs **while changing little to no source code** making it easy to protect your software and start selling online in minutes.

- Create Trial versions of your application that run for a specified number of days and/or executions
- Create subscription-based licensing for your application
- Activate applications with three methods:
  - Online Activations
  - Telephone/email activations
  - File-based activation
- Lock the application to the computer
- Have the ability to register your customer's information with our server or through a browser to a link you specify
- Easily display a splash screen at startup from your bitmap or use our default splash screen
- Detect Activation Key-Generator programs
- Seamlessly integrates with SOLO Server/ Instant SOLO Server
- Easily sell software keys to your application online and let customers activate immediately
- The integrated browser allows you to login into SOLO Server and manage your account
- Automatically retrieve your product information from SOLO which keeps your application's settings in sync
- Periodically check the license status with the licensing server
- Automatically check for updates from within application
- Create new products in SOLO Server using an integrated wizard
- No need for previous Protection PLUS components like LFEEdit
- Protect Win32 PE files (Visual C++, Visual Basic 6, most applications and DLLs not written in .NET):
  - Protect executables from modification by any means trying to change functionality
  - Check executables for integrity at startup
  - Compress executables
  - Protect process space, which holds a protected executable from being dumped by process dumping tools
  - Protect an executable from being disassembled and analyzed by debuggers
  - Protect an executable from being patched on disc
  - Protect a program compiled in an executable from being restored by decompilers such as:
    - \_ The ProcDump process dumping tool
    - \_ The Visual Basic decompiler
    - \_ SoftICE Advanced Windows Debugger
- Protect code, data, and resources stored in an executable from being analyzed and modified by hex editors

## Instant PLUS Licensing Options Screenshot

Within minutes you can protect your application and inject licensing with the Instant PLUS wizard interface within Protection PLUS. It allows you to choose the most common software licensing business logic and inject the security inside of your existing win32 executable without changing source code.

The **Software Development Kit (SDK)** component is loaded with useful options so you can program exactly how you want. Revel in the extensive libraries and sample code for custom licensing business logic.

When you do not want a cookie-cutter solution, get empowered with full-featured tools including 32-bit and 64-bit DLL and static library, 32-bit ActiveX control, and 32-bit .NET component for Windows platforms. The SDK includes samples for C#, VB.NET, VB6, VC6, Microsoft Access and Delphi.

### ■ Primary Licensing Applications

- Create trials, rentals, pay-per-use applications
- Immediate software activation via phone, fax, email, or the Internet
- Extend a trial, rental, or lease for an additional period of time
- Turn on one or more menu options or applications in a suite
- Convert "lite" version to professional version

- Allow partial access; unlock additional features later
- Increase or decrease a usage counter
- Detect clock backdating or trial reinstallation to gain additional usage
- Set triggers on most user-defined actions

### ■ Network Licensing

- Convert application from single-user mode to multi-user mode
- Protect using either fixed or floating network licensing
- Modify the number of allowed network workstations

### ■ Automate Processes with Electronic License Management (when combined with SOLO Server)

**30-Day FREE TRIAL** Sign up for a fully functional 30-Day Trial of Protection PLUS. The trial version contains both Instant PLUS and Protection PLUS SDK, including 30-day product libraries, utilities, documentation, and sample code.

**IMPORTANT:** When you purchase Protection PLUS, anything done with the trial version remains functional and ready to be built upon or extended. No need to restart from scratch!
